JANUARY/FEBRUARY 2015

### SeaLife Micro HD+

The Micro eliminates flooding risk by excluding any way for water to get in – it's permanently sealed and waterproof to 200 feet. It has a 140-degree wide-angle lens, Wi-Fi to connect to smartphone or tablet (an app transfers photos/videos and controls the camera), and shoots 1080p HD video or 13 mp stills. A press of the shutter captures 2 mp stills while filming video. Sweet.

**MSRP:** Micro HD (16 GB memory) \$399.95; Micro HD+ (32GB memory and WiFi) \$499.95 **CONTACT:** [sealife-cameras.com](http://sealife-cameras.com)
