SeaLife Unveils Universal Flex- Connect Ball- Joint Adapter fits most Brands of Lights and Strobes

Moorestown, NJ- SeaLife continues to advance its universally appealing Flex-Connect line by introducing its latest [Flex- Connect Ball Joint Adapter](#) earlier last week. The new SL999 Ball Joint Adapter expands the possibilities of underwater imaging with other manufacturers' lights using the 1"/25mm ball mounting system.

The Flex-Connect Ball- Joint Adapter is a versatile mount designed for easy assembly that will instantly connect the light or flash to Flex-Connect accessories with just a “click”. Although simple in structure, its heavy duty aluminum construction allows for maximum durability and stability suitable for any underwater environment.

Users can now attach their choice of lights to Flex-Connect flex arms, grips, and trays with the new ball-joint adapter making the SeaLife and Flex-Connect system even more universal.

“At SeaLife, we’re constantly thinking of innovative ways to enhance the experience of using an underwater camera,” said Karl Schuster, SeaLife’s Sales Manager. “Since lighting is an essential part for photography, the universal ball- joint adapter allows divers to choose any brand of light to capture the perfect picture or video.”

About SeaLife:

SeaLife Underwater Cameras are made by Pioneer Research in Moorestown, NJ and were first introduced in 1993. In 2000, SeaLife developed the world’s first digital underwater camera. In 2007, SeaLife developed the first non-housed digital underwater camera, and in 2013 SeaLife introduced the powerful Sea Dragon Lighting system and its innovative Flex-Connect tray, grip, arm, and accessory system. In 2014, SeaLife introduced the Micro HD, the world’s first permanently sealed underwater camera, followed by the new Micro 2.0 in 2015 and the cutting-edge DC2000 underwater camera in 2017. SeaLife cameras, lighting and accessories are sold and serviced in 64 countries around the world.
