## SeaLife Offers New Universal Flex-Connect Mounting Kits for Underwater Cameras

SeaLife has introduced three new Flex-Connect Mounting Kits for underwater cameras, each providing a tray, grip and other accessories that serve as a platform for easy expansion. Using the Flex-Connect mounting system, the kits allow underwater photographers to configure a set that is customized to their diving environment. Divers can quickly and easily add lights, cameras, and other accessories to their underwater camera setup, both on land or underwater.

The [Sea Dragon Micro 600 Kit](#) (SLKIT01) includes the popular [Sea Dragon Mini 600 Lumen Light](#), which can be used handheld or mounted to a number of accessories, such as the SeaLife AquaPod. The kit combines the powerful light with a Y-S Adapter, Grip, and Micro Tray, to form an ultra-compact lighting solution for any size camera. The kit also includes an adapter for GoPro cameras, providing the light and stability a GoPro needs for shooting underwater.

Additional sets include the Flex-Connect Single Tray (SLKIT02) and Dual Tray (SLKIT03) Kits. Complete with Flex-Connect Grip, Tray and Flex Arm, these kits help divers get the most out of their underwater camera setups. Just add nearly any brand of camera and light(s), and head into the water. The trays use a standard ¼-20 tripod mount to fit most major brands of underwater cameras, and the Y-S adapter and Flex-Connect mounts attach to a wide array of underwater lighting brands – including SeaLife’s powerful [Sea Dragon](#) line.

Using the Flex-Connect mounting system, each kit can be disassembled instantly with the push of a button for easy travel, or expanded with other more powerful Sea Dragon lights and [Flex-Connect accessories](#). Ranging from ultra-compact to more robust and feature-packed, the versatile Flex-Connect system provides an almost limitless amount of underwater camera setups that can be quickly adjusted and reconfigured. And all Flex-Connect grips, trays and arms feature the ideal shape and ergonomic design for comfortable underwater handling.

|                              |         |       |
|------------------------------|---------|-------|
| Sea Dragon Micro 600 Kit     | SLKIT01 | \$199 |
| Flex-Connect Single Tray Kit | SLKIT02 | \$149 |
| Flex-Connect Dual Tray Kit   | SLKIT03 | \$269 |

**About SeaLife:**

SeaLife Underwater Cameras are made by Pioneer Research in Moorestown, NJ and were first introduced in 1993. In 2000, SeaLife developed the world's first digital underwater camera. In 2007, SeaLife developed the first non-housed digital underwater camera, and in 2013 SeaLife introduced the powerful Sea Dragon Lighting system and its innovative Flex-Connect tray, grip, arm, and accessory system. In 2014, SeaLife introduced the Micro HD, the world's first permanently sealed underwater camera, followed by the new Micro 2.0 in 2015 and the cutting-edge DC2000 underwater camera in 2017. SeaLife cameras, lighting and accessories are sold and serviced in 64 countries around the world.
