SeaLife introduces Sea Dragon 2000 Lumen Underwater Photo-Video Light

MOORESTOWN, NJ – The new Sea Dragon 2000F light features a COB LED array that offers a very favorable color temperature and color rendering for today’s sophisticated digital cameras that by design, require plenty of natural light in order to produce colorful still and video images. The Sea Dragon 2000F closely simulates natural sunlight.

The Sea Dragon 2000 has an impressive CRI of 80 with a color temperature of 5000K making it ideal for underwater imaging use with all cameras, from SeaLife’s range of underwater cameras, to action cam’s up to more sophisticated mirrorless or DSLR cameras. The Sea Dragon 2000F pairs especially well with GoPro’s Hero 6 and 7 camera models, and with SeaLife’s own Micro 2.0 camera.

The Sea Dragon 2000F (The “F” stands for Flood beam) features a 120° topside beam angle, 90° underwater and features three power levels at 100%, 50% and 25% of the 2000 lumen output. The wide beam angle is ideal to pair with compact action cameras, as it ensures the entire area being recorded is flooded with light. Like all SeaLife Sea Dragon lights, the performance and lumen performance is true and tested.

Part of the Sea Dragon’s impressive performance is its powerful 25W Li-ion rechargeable battery pack that runs the light for 60 minutes at full power. Regulated circuitry maintains 2000 lumens throughout the battery life, unlike

-- more --

other lights that dim as battery power is used. The light also includes a battery charger, 3 international plug adapters and a protective travel case.

The Sea Dragon 2000F is easy to expand with SeaLife's Flex-Connect system of trays, grips, arms and adapters. The 2000 can be connected to any underwater camera system using standard ¼-20 tripod or GoPro camera mounts. Flex-Connect ball joint, YS and cold shoe mounts are available making the 2000 compatible with virtually any underwater camera system.

The Sea Dragon 2000 underwater COB LED light will begin shipping in November 2018 in time for the holiday season.

| Item | Description | US Retail |
|--------|--|-----------|
| SL677 | Sea Dragon 2000F Photo-Video Light Kit | \$299.95 |
| SL6770 | Sea Dragon 2000F Auto Photo-Video Light Head | \$249.95 |

About SeaLife:

SeaLife Underwater Cameras are made by Pioneer Research in Moorestown, NJ and were first introduced in 1993. In 2000, SeaLife developed the world's first digital underwater camera. In 2013 SeaLife introduced the powerful and universally fitting Sea Dragon range of underwater lighting and its innovative Flex-Connect tray, grip, arm, and accessory system. In 2014, SeaLife introduced the Micro HD, the world's first permanently sealed underwater camera, followed by the new Micro 2.0 in 2015 and the cutting-edge DC2000 underwater camera for 2017 and beyond. SeaLife cameras, lighting and accessories are sold and serviced in over 60 countries around the world.
