## **SeaLife introduces Sea Dragon® Mini 1300S Dive Light**

MOORESTOWN, NJ – SeaLife has introduced the new Sea Dragon Mini 1300S light. Featuring 1300 lumens, the compact dive light offers users tremendous brightness and a narrow long-range beam. All light functions are easily accessible with one handed operation to cycle through five light modes.

The five light modes are: full power, half power, quarter power, one-second flash signal and emergency SOS signal, both at full power. The light serves as a primary dive light or as a back-up light due to its combination of small, compact size, long run time and impressive power output. With a narrow beam angle of 8° (6° underwater) the powerful 1300 Lumen light is perfect for pointing out sea creatures at a distance, viewing in dark areas or crevices, getting your buddy's attention or navigating a night dive.

The Mini 1300S light is constructed of an anodized aluminum machined body for maximum durability and corrosion resistance. The dual O-ring design ensures reliable waterproof seal down to depths of 330ft/100m. The light's power and mode button also features a battery charge level indicator, which illuminates from green, to amber, to red when batteries charge is depleted.

The Sea Dragon 1300S runs for 3.67 hours with a 18650 rechargeable Li-ion 2600mAh battery at quarter power, 1.83 hours at the half power setting, and 55 minutes at full power. With a 3500mAh 18650 rechargeable Li-ion battery, the light will run 5.5 hours at quarter power, 2.83 hours at the half power setting, and 85 minutes at full power. The battery compartment grip features an integrated safety

-- more --

pressure release valve that relieves internal pressure built-up in the event the battery malfunctions. Two single-use CR123 batteries may also be used with 3 hour run time at quarter power and 45 minutes at full power. The light is sold without batteries (Item SL654), or with a rechargeable 2600mAh Li 18650 battery and USB charger (Item SLKITO8).

The compact Sea Dragon Mini 1300S Dive Light will easily slip into your BCD pocket. A wrist lanyard with a BCD-clip is also included allowing divers to secure the light to their wrist or clipped on to their BCD D-ring.

The Sea Dragon Mini 1300S includes a wrist lanyard with BCD-clip, two spare O-rings and O-ring lube.

The Sea Dragon Mini 1300S will be available for shipment in May 2019.

Item	Description	US Retail
SL654	Sea Dragon Mini 1300S Light	\$99.95

#### **About SeaLife:**

SeaLife Underwater Cameras are made by Pioneer Research in Moorestown, NJ and were first introduced in 1993. In 2000, SeaLife developed the world's first digital underwater camera. In 2007, SeaLife developed the first non-housed digital underwater camera, and in 2013 SeaLife introduced the powerful Sea Dragon Lighting system and its innovative Flex-Connect tray, grip, arm, and accessory system. In 2014, SeaLife introduced the Micro HD, the world's first permanently sealed underwater camera, followed by the new Micro 2.0 in 2015 and the cutting-edge DC2000 underwater camera in 2017. SeaLife cameras, lighting and accessories are sold and serviced in 64 countries around the world.
