This is a perfect combination for compact digital cameras. The 120° beam is ideal for cameras with a wide field of view. Depth rated down to 330 feet/100 meters. 60 minute run time at full power.

The wide 120° beam ensures maximum lighting coverage and is ideal for cameras with a wide shooting angle like the SeaLife Micro-series or RM-4K cameras. 60 minute run time at full power.
