SeaLife® 67mm +10 Macro Lens for popular SportDiver Smartphone Housings & Underwater Cameras

MOORESTOWN, NJ – SeaLife has introduced a new +10 Diopter Macro Lens for their SportDiver underwater smartphone housings that allows close focusing with the phone camera and allows photographers to get to 3 inches (7.6cm) of the subject depending on which phone or camera lens is selected.

The lens works with SeaLife's SL081 Lens Adapter for the SportDiver housing, which can accommodate 67mm and 52mm lenses, the lens simply threads onto the lens mount. The +10 67mm Macro lens also fits onto underwater camera housings with a 67mm thread mount.

The +10 Macro Lens design uses high-grade optics arranged in a 2-element/2- group array that deliver crisp edge-to-edge sharpness. The optics and internal elements are constructed with multi-coated optical glass, with a hard anti-scratch AR lens coating. The typical working range is 75mm to 160mm (3" to 6") from the front of the +10 lens, offering 2.5x magnification for underwater close-ups with excellent sharpness. Depending on the smartphone or camera lens used, the lens could focus even closer, or slightly beyond 160mm.

67mm +10 Macro Lens

The 67mm +10 Macro lens is a “wet lens” design that may be attached and removed underwater and works with smartphones and most cameras. The lens weighs just 5.8 ounces (164 grams) and is negatively buoyant in water.

The +10 Macro lens fits all SeaLife SportDiver smartphone housing models including the SportDiver, SportDiver Ultra and the SportDiver S, when utilizing SeaLife’s SL081 Lens Adapter. The lens includes a protective travel pouch.

The SportDiver 67mm +10 Macro Lens will be available on or about November 1, 2026:

Item	Description	US Retail
SL577	SeaLife 67mm +10 Macro Lens	$179.95

About SeaLife:

SeaLife Underwater Cameras are designed and created by Pioneer Research in Moorestown, NJ and were first introduced in 1993. In 2000, SeaLife developed the world’s first digital underwater camera. In 2007, SeaLife developed the first non-housing digital underwater camera, and in 2013 SeaLife introduced the Sea Dragon underwater lighting system and its innovative Flex-Connect tray, grip, arm, and mounting accessories. In 2014, SeaLife introduced the Micro HD, the world’s first permanently and fully sealed digital underwater camera, followed by the new Micro 2.0 in 2015 and the cutting-edge DC2000 underwater camera in 2017. In 2020 the company expanded into compact underwater cameras with its full-featured Micro 3.0 camera. In 2021, SeaLife introduced its first ever smartphone housing; the SportDiver® fits almost all iPhone and Android smartphones. SeaLife cameras, lighting and accessories are sold and serviced in over 60 countries around the world. For more information visit www.SeaLife-Cameras.com
